

## 4,000 Ports. 10,000 Agents. \$10 Billion Port Cost Data. The system for dynamic port data is just a few clicks away.

The idea is simple: fast and easy access to port intelligence. Connect your working day to data with PortPoint.

Effective, quick and simple, PortPoint is an advanced port cost analytics platform, designed with great usability to get you that port cost estimate when you need it the most.

Obtain your single figure port cost result in one simple search. Choose detailed specific breakdowns based on specific port, vessel type, cargo type and DWT or search for results that contain thousands of cost benchmarks.

Look up your own port calls and costs, add comments, and develop a personal profile and preferences that only you can access.

With this platform, you gain instant access to vast amounts of cleansed and accurate cargo and port call data.

**Say hello to port intelligence!**

## Powerful data at your fingertips

Working with data often means clinical, hard-to-find lists, which might be easy to understand if you're an analyst, but hard or impossible for most others. With PortPoints' business intelligence tools, you get a simplified visualization of the data you want.

Gaining in depth port cost knowledge and port related intelligence has never been so easy.

### PortCosts

With PortCost, you can quickly and easily access port, cargo and vessel specific costs. In addition, you can gain insight into port cost trends over time and obtain clear benchmarks and cost breakdowns. The accurate port cost data can help you provide useful business intelligence to feed into your voyage calculations.

### PortPages

With PortPages you can access, verify and look-up details of 10,000 agents. Each and every agent has been through a vetting process before getting onto this list.

We actively engage agents so you get the right phone number at the first call. To ensure a dynamic listing, each agent is checked against 17 sanctions lists on a daily basis.

Your compliance and procurement department will love that!

### PortInfo

PortInfo provides a simple platform to access information about terminals and berths in as many as 4000 ports. Search for updated details from actual experience restrictions and conditions.

PortInfo is closely linked to PortCosts and interaction is seamless.
